Transformation Networks for Consistent Evolution of Multiple Heterogeneous Models

zur Erlangung des akademischen Grades eines

Doktors der Ingenieurwissenschaften

der KIT-Fakultät für Informatik
des Karlsruher Instituts für Technologie (KIT)

vorgelegte

Dissertation

von

Heiko Klare

aus Höxter

Tag der mündlichen Prüfung: XX. Monat XXXX
Erster Gutachter: Prof. Dr. Ralf H. Reussner
Zweiter Gutachter: Prof. Dr. Colin Atkinson

Abstract

Zusammenfassung

Contents

Abstract i

Zusammenfassung iii

I. Prologue 1

1. Introduction 3

2. Foundations 5

II. Formalizing Transformation Networks 7

3. A Classification of Consistency Specification Levels 9

4. A Categorization of Errors in Transformation Networks 11

5. A Formalization of Transformation Networks 13

III. Building Correct Transformation Networks 15

6. Analyzing Transformations for Contradicting Consistency Relations 17

7. Ensuring Interoperability of Executed Transformations 19

8. Orchestrating the Execution of Transformation Networks 21

IV. Improving Non-Functional Properties of Transformation Networks 23

9. Topologies and Properties of Transformation Networks 25

10. Specification of Consistency Relations with Commonalities 27

11. A Consistency Specification Language for Commonalities 29

V. Evaluation and State-of-the-Art 31

12. Evaluation and Discussion 33

13. Related Work 35

VI. Epilogue 37

14. Future Work 39

15. Conclusion 41

Part I.

Prologue

1. Introduction

2. Foundations

Part II.

Formalizing Transformation Networks

3. A Classification of Consistency Specification Levels

4. A Categorization of Errors in Transformation Networks

5. A Formalization of Transformation Networks

Part III.

Building Correct Transformation Networks

6. Analyzing Transformations for Contradicting Consistency Relations

7. Ensuring Interoperability of Executed Transformations

8. Orchestrating the Execution of Transformation Networks

Part IV.

Improving Non-Functional Properties of Transformation Networks

9. Topologies and Properties of Transformation Networks

10. Specification of Consistency Relations with Commonalities

11. A Consistency Specification Language for Commonalities

Part V.

Evaluation and State-of-the-Art

12. Evaluation and Discussion

13. Related Work

Part VI.

Epilogue

14. Future Work

15. Conclusion
